

Hill Field Road Sewer Upgrade Project

Gordon Avenue to Antelope Drive

Sewer line upgrades are progressing along Hill Field Road between Gordon Avenue and Antelope Drive in Layton. The North Davis Sewer District is removing and replacing existing sewer manholes and pipes and installing upsized pipes to meet current and future wastewater/sewer collection needs. Work is being completed in sections along the western shoulder of the Hill Field Road corridor. Project completion is expected by late fall 2024.

Schedule

- Crews are wrapping up work between Forbes Avenue and just south of Antelope Drive. This section is substantially complete. A final pavement overlay is planned Monday, August 5.
- **Beginning the evening of Sunday, August 4, night work will start on the southern end of Hill Field Road past the mall. Full directional closures will be in effect for approximately six weeks to facilitate the pipe crossing from the east to the west side of the road. All travel lanes will be reopened to traffic during daytime hours after 6 a.m.**
- **Initially, northbound Hill Field Road will be closed Sunday through Thursday nights from 9 p.m. to 6 a.m. between Gordon Avenue and 1225 North. Northbound traffic will be detoured on Gordon Avenue to 250 West and then 1225 North back to Hill Field Road. Southbound lanes will remain open during this work. Residential access only will be maintained south of 1225 North.** This configuration is expected to remain in place for approximately three weeks and then work will shift to southbound lanes, with another three-week night-time closure planned there. Night-time work is expected to begin mid-August at the Antelope Drive intersection and continue through early fall 2024. Lane restrictions will be effective at the intersection nightly between 9 p.m. and 6 a.m. and all travel lanes will be reopened during daytime hours.
- During night work, residents in the area should expect night-time noise, lighting and vibrations. Crews will work to minimize impacts as much as possible.

Gordon Avenue to Antelope Drive

Construction Impacts

During construction, businesses and residents should expect:

- Business and residential access will be maintained. Properties with multiple driveway accesses will have driveways closed one at a time with advance notice prior to closures.
- Residences will require temporary driveway closures with advance notice. Residents may park on the roadway shoulder during these closures.
- Driveways will not be affected on the eastern side of Hill Field Road.
- Pipe installation involves open trenching along the western shoulder of the roadway. Please reduce speeds, exercise caution, watch for lane shifts and stay out of work zones.
- A temporary sewer bypass will be in place to maintain constant sewer service in work zones.
- Utility service interruptions are not planned with this project, however, 48-hour advance notice will be provided if they become necessary.
- Crews will work to minimize noise, dust and vibrations as much as possible.
